Theories of Alfie

NO GRADES + NO HOMEWORK
BETTER LEARNING

ALFIE KOHN
No Homework!

● The negative effects of homework are well known,
● “No study has ever substantiated the belief that homework builds character or teaches good study habits.”
● More homework is being piled on children despite the absence of its value.
● Frustration, fights, over-time lull = poor psychological state

“Rethinking Homework”

No Homework!

What are we to do?
- Re-think homework policies
- Focus on QUALITY not quantity
- Change the default: “No homework except on those occasions when it’s truly necessary.”
- Ask for input from the kids
- Assign only what you design
- Use it as a decision making opportunity

“Rethinking Homework”
"I remember the first time that a grading rubric was attached to a piece of my writing….Suddenly all the joy was taken away. I was writing for a grade -- I was no longer exploring for me. I want to get that back. Will I ever get that back?"

Claire, a student (in Olson, 2006)
No Grades!

● Grades tend to diminish students’ interest in whatever they’re learning

● Grades create a preference for the easiest possible task

● Grades tend to reduce the quality of students thinking
No Grades!

If there are no grades, then what do we do?!?

- Provide qualitative feedback
- Invite students to join in the grading process
- Stronger relationships
- Self-evaluation, stronger awareness
- Accommodate to unique learning styles
- Deeper learning

“The Case Against Grades”
Alfie’s Ideal Classroom...

- Curiosity and cooperation are emphasized above all else.
  - Alfie believes that the students’ curiosity should govern what is taught inside the classroom.
- Alfie is very critical of Standardized testing.
  - This type of testing enforced a strict curriculum that is not flexible to the students’ interests and needs.

Thoughts on Classroom Management

- “Hands Off” type of management approach
- “If classroom is run with cooperation in mind, and if the student’s curiosity is being nurtured, than students’ will act appropriately and neither rewards nor punishments will be necessary.

Progressive Progressive Progressive Education

What is it?
- Attending to the whole child
- Community
- Collaboration
- Social Justice
- Intrinsic Motivation
- Deep Understanding
- Active Learning
- Taking Kids Seriously

What is it not?
- Touchy-Feely
- Loosey-Goosey
- Fuzzy
- Fluffy
- Undemanding Exercises
- Kids are free to do whatever they like
- Curriculum is made of whatever students feel is fun

“Progressive Education”
Several newer studies confirm that traditional academic instruction for very young children is counterproductive.

Students in elementary and middle school did better in science when their teaching was “centered on projects in which they took a high degree of initiative. Traditional activities, such as completing worksheets and reading primarily from textbooks, seemed to have no positive effect.”

Another recent study found that an “inquiry-based” approach to learning is more beneficial than conventional methods for low-income and minority students.

“Progressive Education”
Why is it so rare?

- Less familiar
- Harder to do, especially well
- Asks more of students, throws them off
- More demanding of teachers
- Asks teachers to abandon the predictable march towards the right answer
- Revolves around uncertainty
- “Thinking is messy. Deep thinking is really messy.”

“Progressive Education”
STOP saying “Good job!”

1. Manipulating kids
2. Creating praise junkies
3. Stealing a child’s pleasure
4. Losing interest
5. Reducing achievement

“Five Reasons to Stop Saying ‘Good Job!’”
“Five Reasons to Stop Saying ‘Good Job!’”

Then what should we say..?

- Say nothing
- Say what you saw, observed
- Talk less, ASK more
Think of your students as serious learners who construct knowledge from a variety of experiences. Organize the classroom into a community of learners, interconnected and concerned with each other. Use classroom meetings to address concerns about instructional matters and personal behavior.
THINK, PAIR, SHARE

- Find a partner across the room
- TALK about what you want to use of Alfie’s theories in your own classroom philosophy. If you don’t care to use any of his theories, then explain why.
- You have 36 seconds
- CIRCLE TIME for quick sharing!
The way kids learn to make good decisions is by making decisions, not by following directions.
